

<akemi@oven.com>Umm...apple-shift-C is powerful.useless photoshop fact:-you can only have 99 layers.A*>>On Wed, Mar 29 2000, Iram Quraishi wrote:> I.R.A.M.: Intelligent Robot Assassination Machine DAVID: Digital Artificial Violence and Infiltration Device--clive,you didn't dream it. There's an OVEN advert coming out in the new issue of Mute Magazine (which should be out any day now, if it's not out already). The advert consists of a cut and paste text of some allondon conversations and a lot of it is your diary of our Kent weekend.I've got a copy of it on my machine if you'd like to have a look. L > From: "clive.murray." <clivem@oven.com> Reply-Subject: [Alllondon] MyText? > oh yeah... the other day someone (I forgetwho) said that they'd seen an advert for Oven which used my journal text from the canterbury trip in the background. anyone know where I could see this, just for interest? or did I dream it...?> --c.On Wed, May 31, 2000 David Cantrell wrote:> Can whoever put Shatnersongs on the server please own up? > ok -i admit it - it was me (i saw them on a hotline server and grabbed them during a temporary loss of taste)>matt (in paris)>From: Matthew Allum <mallum@oven.com>RESPECT.you wrote:>I am now the proud owner of NewMediaNewArse.com :-)><toke@oven.com> It is official! It is the workmen, filthy bastards, who piss on the seats! I just saw one watering the entire cubicle. I didn't say anything. I ran out .I was scared. I was a coward. I let you all down... I did not believe you. And you were my friends. I called you names. I did evil things to your pets. You will never be able to trust me again.:(-t>>the sims appears to be great fun, but as yet I haven't had much time to play it. the startup family in the tutorial (Bob and Betty Newbie) were doing fine for a while with Betty going off to work in the morning and Bob lazing about the house and inviting his mates over, then rushing round and clearing up just before Betty got in. Then Betty changed her job to the night shift just as Bob found a day job. With the two of them on different schedules, things rapidly went pete tong and Betty ended up losing her job. that's the last I saw of them. I reckon it has potential, though...--c.> aarrgh. They've promised us a mac version for 2 years now . Also, Clive, please give us an update on how your The Sims game is going.> t> [Alllondon] Naxos or Santorini? >I am off to Greece with a mate this summer. Where should we go -we have two choices: Naxos or Santorini? We want all but the Ibiza feel. <simon@oven.com> I would say Naxos - much nicer and less poluted. Also San Torini has black sand (lava) on the beaches... you can't walk on those when theres a sun in the sky . uhu .. But, San Torini may be better of if you like to party. Whatever you do -don't fly to Athens and take a boat from there, I spent 12 hours under a burning sun without food and water on a crappy ferry from Athens to Naxos - you don't want to do that...>>do we have 2 Mattias from Sweden in this office?? I don't understand a ting... Sent: Thursday, April 06, 2000 Subject: Re: [Alllondon]who put the best band in the world on? It must be an old e-mail from when I put on the juicy Destiny's Child CD on. Mhhh... makes me feel like revealing Mattias' true self: in Sweden he has an entire posse of lustful boys, all gathering at their posh friend's place to listen to the softest of all garage music, and they even KNOW THE LYRICS!! You know: "[something] seleeectoor". Fucking hell. Then they all start dancing some sort of weird booty-dance where they lift one leg as if they are pissing dogs, and flex their butt-cheeks, it is a ghastly sight. If you ever see Mattias do it please tell him to stop it.>It needs IE3, IE4, IE5 (all of them for both Winduhs and Mac); Netscape 2, 3, 4.0, 4.7 and 6 for Win, Mac, and [Joe Random Unix]; lynx and w3m; hotjava versions 1 and 3; amaya; latest Mozilla build. This requires at least four machines - one each of of Win, Mac and Unix, with extra machines because IE3/4/5 can not co-exist on Win (dunno about Mac). Plus we also need a PDA and a mobile for testing on, and of course the appropriate software for those platforms. We should ensure phone -----
